- Small compact design.

GENERAL DESCRIPTION:

The Ruelco 'RQ-1' hydraulic quick exhaust is designed to rapidly bleed the control pressure from an actuator or other hydraulic device. It is typically used on safety valves, control valves, or other devices that must respond quickly when the control signals are removed. It's in-line design and three part construction make the quick exhaust easy to install and maintain. No special tools are needed for repair and assembly. The Ruelco 'RQ-1' will improve equipment operation and reduce maintenance time.
