June 2014 | Volume 1, Issue 4

HC-1 Model 8100 3-Way Interface Valve

The Ruelco Interface Valve is a normally closed 3-way block and bleed hydraulic controller. The valve allows the system to control pressures as high as 10,000 PSI with a pilot supply pressure of 100 PSI. The unique soft seal design ensures zero leakage and also prevents damage from foreign particles. Ruggedly constructed for years of reliable service.

- 316 stainless steel construction (models to N.A.C.E. MR0175 available).
- Large Cv factor ensures a fast system response.
- All soft seal design.
- Design minimizes malfunctions due to supply system debris.
- ATEX Certified models available.

Latest News & Events

Ruelco is pleased to announce the hiring of Sharell Chatman and Christopher Podany

Sharell was hired in May 2014 for the position of Quality Control Inspector. She has a BA in Sociology and a BS in Industrial Engineering Technology from Northwestern State University.

Sharell will be working in our QC department as well as on improvement of many of our other industrial processes.

Chris was hired in June 2014 for the position of Mechanical Engineer. He has a BS in Mechanical Engineering from the University of New Orleans. Chris will be helping with future product design and innovation as well as many of the other ongoing projects in our Engineering department.

Ruelco is excited about the addition of these new employees and look forward to their positive contributions to the company.
