Ruelco MP-2 Manual Reset Relay

The Ruelco MP-2 relay is a multi-pressure control valve for production control and safety systems. It functions as a manual reset, pilot operated, normally closed, block and bleed valve.

- 316 stainless steel construction (models to N.A.C.E. MR0175 available).
- Easy to close with pilot signal pressures as high as 100 PSI.
- Large Cv factor assures fast system response.
- For use in pneumatic systems.
- 'Lock closed' design prevents relay from automatically opening.
- Viton and nitrile seals are utilized for dependability.
- Design minimizes malfunctions due to supply system debris.
- Inconel X-750 20 PSI spring assures dependability in most corrosive environments (optional 30 PSI spring available).
- Optional stem protector available to prevent external debris accumulation on relay shaft.
- Optional double detent assembly available.

- Optional remote reset override available (Model 15A1).
- Available with black, red, or green knob (black standard).
- ATEX Certified models available upon request.
