## Ruelco High Pressure Regulator

The Ruelco High Pressure Regulator is a rapid response regulator designed to give precise low pressure control of a high pressure signal. A 6000 PSI inlet and a 0-250 PSI outlet allow the regulator to provide a steady control pressure. The valve also comes standard with a 20 micron stainless steel filter to ensure long life and clean flow.

- 316 stainless steel construction (models to N.A.C.E. MR0175 available).
- 6000 PSI inlet and 0-250 PSI outlet.
- Viton and Nitrile seals are utilized for dependability.
- Stainless steel filter and design minimizes malfunctions due to supply system debris.
- Up to 3 outlet ports available (1 outlet port is standard).
- Self Relieving Model also available.
